TERRA PACIFIC LANDSCAPE

	? ?
LOW - COST	**Read Your Meters:** Ask your landscaper to read your irrigation water meters on a weekly basis. It's easier to control water use when you know exactly what you're using. **Pull high water users:** Remove Ivy from under shrubs & hedges; transition Daylilies to Flax; mulch. **Mulch:** Conserve water, decrease weeds. **Seasonal Color:** Reduce or Eliminate **Irrigation /Water Mgmt:** Weekly Meter Readings & Irrigation Renovation
HIGHER - COST	**Audit your system:** Do a zone-by-zone evaluation of your coverage. **Drip:** Install drip irrigation wherever possible. **Smart Controllers:** Before considering installing a SC, make sure you have at least 85% coverage in your irrgation system. **Transplant:** Move all Agapanthus or Daylilies to 1 or 2 areas, in order to reduce the areas that require more water. **Sustainable by design:** When you plant, use plants that won't quickly out-grow their area, that aren't susceptible to bugs and diseases, don't use a lot of water, and don't need constant maintenance. **Plant Replacement:** Plant Kangaroo Paw instead of Agapanthus **Turf:** Reduce, Transition or Eliminate **Green Roofs:** Stormwater Mgmt, Energy Reduction & Savings
